# **Executive Summary**

**AVERAGE** 

#### A good performance in Security, Social and Usability

Your website is safe to use. Some improvements are always possible with a more extended audit, but no major issue has been detected during our security audit. Awesome, you manage your social media presence really well! A great usability is synonymous to a great user experience. If you are able to convey your experience on mobile and desktop and at the same time, with a good loading speed, you are delivering the basics of a good usability

#### SEM and SEO should be improved for optimum results.

You seem to be active on PPC advertising, but there is still some room for improvement. You are under-optimized and there's a lot you can do to improve the ROI of your web presence and get more visitors to your website.

# **Organic Traffic**

# **Technical SEO**

#### Sitemap.xml found

Nice, your sitemap.xml can be found. It allows search engines to find all of your webpages easily.

#### Robots.txt found, but Disallow All

Your robots.txt file forbids search engines to crawl your website. You are basically nonexistent on the web. This is a major issue.

# $\checkmark$

domain to www redirection is working fine Whatever people type, they will find your

site.

## InPage SEO (Home page)

Your headings seem to be problematic Headings are the title and subtitles of your site. They are really important for search engines.

# Alt Tags

Ŧ

Unfortunately, this data could not be retrieved at this time. Please try to run this audit later.

The description of your page will be displayed on the search results and is the second most important SEO signal.

#### Your title has a perfect length

The title of your page will be displayed on the search results and is the most important SEO signal.
